

Transaction Set 264 - Mortgage Loan Default Status

Transaction set (TS) 264 is used for the submission and processing of mortgage loan default data. HUD's Single Family Default Monitoring System (SFDMS) is currently used to monitor more than 13,000 mortgagees who have been approved by HUD to finance or service FHA-insured family properties. Mortgagees are required to submit form HUD-92068A when an FHA mortgagor is 90 days delinquent. They are required to resubmit the form every 30 days until the mortgage is settled or terminated. Mortgagee Letter 96-14, Attachment #1 dated April 1996 provided a schedule for mortgagees to complete EDI implementation of Forms HUD-92068A (Monthly Delinquent Loan Report), HUD 92080 (Mortgage Record Change), and HUD-27050-A (Mortgage Insurance Termination). All trading partners were mandated to be EDI-capable by December 1997 for defaults and mortgage record changes. The mandate for claims was August 31, 1997.

This section of the Implementation Guide describes the relevant processes involved in using EDI for the collection and dissemination of single family mortgage loan default reports. Paperless default reporting has the following advantages:

- The number of times the same information is manually processed is reduced;
- With the implementation of the form generation specifications provided to mortgagees for HUD-92068A preparation, a majority of the current data errors are eliminated;
- EDI improves the communication between HUD and mortgagees and decreases the staff time required for mortgage loan default reporting;
- EDI allows HUD to provide feedback to mortgagees on default error cases electronically; and
- EDI allows mortgagees to submit corrections electronically within the same reporting cycle.

Utilizing EDI, mortgagees and servicers electronically transmit loan default data from their computers to HUD Headquarters through a VAN. The information is in a standard X12 format (TS 264). Upon receipt and acceptance of the electronic input, the loan default information is verified for completeness, and then passed to HUD's SFDMS for processing. The sender receives an acknowledgment of HUD receipt in the form of an X12 TS 997, Functional Acknowledgment.

Electronic loan default data is either moved forward in processing, or a TS 824 is communicated back to the sender requesting corrections. An 824, Application Advice, used as a request for correction will require the sender to resubmit a corrected TS 264.

Detailed step-by-step instructions are provided in the following pages for

implementation of the TS 264, including mapping of the transaction set to the components of the form HUD-92068A. The 264 is an approved X12 Draft Standard for Trial Use (DSTU).

Transmission Notes for Transaction Set 264

To successfully transmit TS 264, the following items should be reviewed:

- Ensure that the interchange control segments information for you and your trading partners is specified as discussed in Appendix C; and
- Ensure that all data is in the format required by HUD's application system.

Each bullet point is discussed in the paragraphs below.

Interchange Control Segments. As stated in Section III, the interchange control segments contain control information about you and your trading partner(s) and indicate the number of functional groups included in the transmission. An interchange control header (ISA) identifies the beginning of an interchange of one or more functional groups and interchange-related control segments; whereas, an interchange control trailer (IEA) defines the end of an interchange of one or more functional groups and interchange-related control segments. Ensure that all specifications, as outlined in Appendix C, are met.

Data format. HUD's application system requires specific formats for data elements within TS 264. These format requirements include usage of parentheses and hyphens and the acceptable length for HUD's application system when it is less than the length allowed in the X12 standards. Format requirements for individual data elements are specified in the shaded note sections of the Data Mapping Guide for TS 264, presented later in this section.

Business Scenarios

A business scenario illustrates the construct of a transaction set transmission. For the 264, it provides a simple mortgage loan default status report in EDI format. To assist in the use of the TS 264, two business scenarios are provided. Following the business scenario description, a table is provided for each line of the associated EDI transmission with an explanation of the content of the transmission.

Business Scenario 1

The following is an example of a mortgage loan default status report submitted in EDI X12 format. This business case describes the submission of detailed default information for loans that are 90 or more days delinquent.

Suntrust Mortgage, Inc., P.O. Box 4333, Atlanta, GA 92681-4333, is reporting on six 90-day delinquent mortgages to the U.S. Department of Housing and Urban Development (HUD) for the period ending November 30, 1992. The HUD principal servicing office which holds *Suntrust's* mortgage documents is located in Savannah, Georgia. *Suntrust* is reporting to HUD on behalf of one mortgagee with two delinquent mortgages. *Suntrust* is assigned a Mortgagee Number of 3267080039 by HUD.

Suntrust's contact for the mortgagee is a general contact, Mary R. Richards, who can be reached at telephone number (404) 756-4911. The Mortgage Loan Number assigned by *Suntrust* to the first mortgage being reported on for this mortgagee is 5834143175 and the Federal Housing Administration (FHA) Case Number for the mortgage is 293145637. The ADP code for the FHA case number is 203. The mortgagor of the first mortgage is John R. O'Donnell and his Social Security Number is 230-32-8768. The co-mortgagor's name is Martha S. O'Donnell and her Social Security Number is 227-27-1928. The property is occupied by the borrowers and is located at 1128 West Park Avenue, Atlanta, GA 22893. The cause of default on this mortgage has been determined to be due to illness of the principal mortgagor. The due date of the first mortgage payment is February 1, 1988, and the date of the oldest unpaid installment is September 1, 1992. The mortgage status for this case is being reported as 90 or more days delinquent for the first time, and the date will be reported as November 30, 1992. Neither the mortgagor nor the co-mortgagor has filed for bankruptcy.

The Mortgage Loan Number assigned by *Suntrust* to the second mortgage being reported on for the first mortgagee is 5713414385 and the FHA Case Number for the mortgage is 736541392. The ADP code for the FHA case number is 203. The mortgagor of the second mortgage is Pauline E. Paulsen, whose Social Security Number is 330-42-9768. The property is occupied by the borrower and is located at 39 Finch Lane, Atlanta, GA 22893. The cause of default on this mortgage has been determined to be due to curtailment of income. The due date of the first mortgage payment is April 4, 1990, and the date of the oldest unpaid installment is September 16, 1992. The mortgage status for this case is being reported as 90 or more days delinquent for the first time, and the date will be reported as November 30, 1992. The mortgagor has not filed for bankruptcy.

Business Scenario 2

The following is an example of a mortgage loan default status report submitted in EDI format. This business case details the resubmission of corrected and verified detailed default information for loans that are 90 or more days delinquent.

The *New Home Savings Bank*, recently moved to a new office site at 6158 Cobblestone Lane, Friendship, MD 21792-4404, is reporting on three 90-day delinquent mortgages to the U.S. Department of Housing and Urban Development (HUD) for the period ending November 30, 1992. *New Home Savings Bank* owns and services its own mortgage loans, the HUD principal servicing office which *New Home* reports to is located in the same city as *New Home*. The contact person for *New Home Savings Bank* is a general contact, Reeba M. Lipps, who can be reached at the telephone number (301) 556-7926. *New Home* is assigned a Mortgagee Number of 1143264000 by the Department of Housing and Urban Development.

The Mortgage Loan Number, assigned by *New Home Savings Bank* on the first mortgage being reported is 1212392577 and the Federal Housing Administration (FHA) Case Number for the mortgage is 371041022. The ADP code for that FHA case number is 486. The mortgagor is Aida D. Abebe and her Social Security Number is 436-00-5124. There is no other mortgagor recorded for this loan. The property is occupied by the borrower and is located at 3233 Waterman Road, Cambridge, MD 20038-5327. The cause of default has been reported to be the excessive obligation of the principal mortgagor. The due date of the first mortgage payment is November 1, 1982, and the date of the oldest unpaid installment is July 1, 1992. The status for this mortgage loan indicates that foreclosure started on November 16, 1992. The mortgagor has filed for Chapter 11 bankruptcy on September 13, 1992.

The Mortgage Loan Number assigned by *New Home* to the second mortgage being reported is 8518647584 and the FHA Case Number is 251599967. The ADP code for the FHA Case Number is 486. The mortgagor is Anne P. Loew and her Social Security Number is 229-45-5621. The property is occupied by the borrower and is located at 6851 Hood Lane, Easton, MD 20037-5734. The cause of the default has been determined to be due to marital difficulties. The due date of the first mortgage payment is March 12, 1990 and the date of the oldest unpaid installment is September 23, 1992. The mortgage status for this case is being reported as 90 or more days delinquent for the first time, and the date will be reported as November 30, 1992. The mortgagor has not filed for bankruptcy.

The Mortgage Loan Number assigned by *New Home* to the third mortgage being reported is 7563217564 and the FHA Case Number is 321456987. The ADP code for the FHA Case Number is 486. The mortgagor is Wayne C. Pudd and his Social Security Number is 227-02-9874. The property is located at 4321 Sea Drive, Salisbury, MD 20043-3212. The cause of the default has been determined to be due to illness of the mortgagor's family member. The due date of the first mortgage payment is November 19, 1989 and the date of the oldest unpaid installment is September 26, 1992. The mortgage status for this case is being reported as 90 or more days delinquent for the first time, and the date will be reported as November 30, 1992. The mortgagor has not filed for bankruptcy.

Transaction Set 264 Outline

Transaction set (TS) 264 will be used by mortgage lenders to file single family mortgage loan default information with government agencies and private mortgage insurers. The information in a standard format will allow all notifications of mortgage loan default/foreclosure status to be filed similarly, whether they be to an insurer or guarantor. The following pages contain the 264 transaction set outline.

264 Mortgage Loan Default Status

Functional Group ID=**MG**

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Mortgage Loan Default Status Transaction Set (264) for use within an Electronic Data Interchange (EDI) environment. This package of information in the standard format will allow all notifications of mortgage loan default/foreclosure status to be filed similarly, whether they be to an insurer or guarantor. The transaction set can be used to initiate two types of monthly reports (monthly and quarterly) that will facilitate monitoring of delinquent mortgage loans. This transaction set is expected to be used by mortgage lenders to submit advance notification of delinquent mortgage loans that could potentially result in foreclosure activity leading to the collection of a third-party guarantee/insurance benefit. This standard can be used by mortgage lenders to file default status reports with both government agencies and private mortgage insurers.

Transaction Set Notes

1. The BGN segment indicates whether the set is a corrected and verified or an advance notification transmission.
2. The MIS segment provides information on the name and address change of the sending party.
3. Loop 0100 identifies the sending and or the receiving parties.
4. N4 may also contain the geographical location of the sender's principal servicing office, if any.
5. Each iteration of loop 0200 is used to provide mortgagee information associated with a specific group of mortgages.
6. Loop 0210 is used to provide detail loan default information on a specific mortgage loan. The DTP segment contains the reporting date of loan defaults.
7. The REF segment provides the associated reference numbers for a specific mortgage loan.
8. Loop 0211 provides information on the mortgagor, or the property owner, or the investor.
9. The N3 and N4 segments contain the address information for the property.
10. Loop 0212 contains detail loan default and foreclosure information on a specific mortgage loan. The REC segment provides information on the real estate condition of the property. REC04 and REC05 provide information on damage and number of living units on the property and are not used in transaction set 264.

- 11.** The N3 and N4 segments provide the address information for the property.
- 12.** The DFI, QTY, AMT, INT, SOM, DTP and MRC segments provide detail default information on the mortgage loan.
- 13.** The MSG segment provides loan detail remarks or comments.
- 14.** QTY and AMT provide loan administration summaries for all mortgages reported in Table 2.

Data Mapping Guide

The following data mapping guide for TS 264 is based on version 003032 of TS 264, as defined by X12 standard. It has been modified to accommodate the 8-digit dates required for year 2000 data. The guide presents essential information for each of the segments and the constituent data elements.

**Data Mapping Guide
Transaction Set 264
Mortgage Loan Default Status**

Segment: **ST** Transaction Set Header
Position: 010
Loop:
Level: Heading
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Syntax Notes:
Semantic Notes: 1 The transaction set identifier (ST01) is used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).
Comments:
Notes: The ST segment is required each time a Transaction Set is sent.

Data Element Summary

	Ref.	Data	Attributes
	Des.	Element Name	
Must Use	ST01	143 Transaction Set Identifier Code	M ID 3/3
		Code uniquely identifying a Transaction Set 264 X12.285 Mortgage Loan Default Status	
Must Use	ST02	329 Transaction Set Control Number	M AN 4/9
		Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set The ST segment is required each time a Transaction Set is sent.	

Segment: **BGN** Beginning Segment
Position: 020
Loop:
Level: Heading
Usage: Mandatory
Max Use: 1
Purpose: To indicate the beginning of a transaction set
Syntax Notes: 1 If BGN05 is present, then BGN04 is required.
Semantic Notes: 1 BGN02 is the transaction set reference number.
 2 BGN03 is the transaction set date.
 3 BGN04 is the transaction set time.
 4 BGN06 is the transaction set reference number of a previously sent transaction affected by the current transaction.
Comments: 1 BGN05 is the transaction set time qualifier.
Notes: The BGN segment is required each time a Transaction Set is sent.

Segment: **MIS** Mortgagee Information Status
Position: 030
Loop:
Level: Heading
Usage: Optional
Max Use: 1
Purpose: To provide status indicating change in name, address, or name and address of the holding mortgagee or the servicing mortgagee

Syntax Notes:

Semantic Notes:

- 1 MIS01 defines the type of change in mortgagee information. For example, "NH" indicates a change in name for the holding mortgagee.
- 2 MIS02 through MIS04 provide the date associated with the change, if any.
- 3 MIS05 identifies the jurisdiction of the regional servicing office.

Comments:

Notes: MIS provides information on the name and address change of the reporting party, who is always the Servicing mortgagee.

Segment: **N1** Name
Position: 040
Loop: 0100 Mandatory
Level: Heading
Usage: Mandatory
Max Use: 1
Purpose: To identify a party by type of organization, name, and code
Syntax Notes: 1 At least one of N102 or N103 is required.
 2 If either N103 or N104 is present, then the other is required.
Semantic Notes:
Comments: 1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
 2 N105 and N106 further define the type of entity in N101.
Notes: N1 begins Loop 0100. For the first iteration of this loop, N1 contains the name of the reporting party, who is always the Servicing Mortgagee, and the 10 digit HUD-assigned Mortgagee number.
 For the second iteration of Loop 0100, N1 provides the identifier "Principal Servicing Office" (Z) that is defined in N4 in position 070.

Segment:	LS Loop Header
Position:	170
Loop:	0210 Mandatory
Level:	Detail
Usage:	Optional
Max Use:	1
Purpose:	To indicate that the next segment begins a loop
Syntax Notes:	
Semantic Notes:	<p>1 One loop may be nested contained within another loop, provided the inner nested loop terminates before the outer loop. When specified by the standard setting body as mandatory, this segment in combination with "LE", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.</p>
Comments:	<p>1 See Figures Appendix for an explanation of the use of the LS and LE segments.</p>
Notes:	The LS segment, when used, requires the segment immediately following it and the LE segment in position 290 to be sent.

Data Element Summary

Segment: **LE** Loop Trailer
Position: 290
Loop: 0210 Mandatory
Level: Detail
Usage: Optional
Max Use: 1
Purpose: To indicate that the loop immediately preceding this segment is complete
Syntax Notes:
Semantic Notes: 1 One loop may be nested contained within another loop, provided the inner nested loop terminates before the other loop. When specified by the standards setting body as mandatory, this segment in combination with "LS", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop beginning segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.
Comments: 1 See Figures Appendix for an explanation of the use of the LE and LS segments.
Notes: The LE segment is required when the optional LS segment in position 170 is used.

Data Element Summary

	Ref.	Data	Attributes
	Des.	Element Name	
Must Use	LE01	447 Loop Identifier Code	M AN 1/4

The loop ID number given on the transaction set diagram is the value for this data element in segments LS and LE

NOTE: LE01, the Loop Identifier Code, shall always have a value of 0212 to indicate the segment immediately preceding it completes Loop 0212. The corresponding LS01 in the LS segment, shall have an identical value of 0212 to indicate the segment immediately following it begins Loop 0212.

Segment: **SE** Transaction Set Trailer
Position: 030
Loop:
Level: Summary
Usage: Mandatory
Max Use: 1
Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).

Syntax Notes:**Semantic Notes:**

Comments: 1 SE is the last segment of each transaction set.

Notes: The SE segment is required each time a Transaction Set is sent.

Data Element Summary

	Ref.	Data	Attributes
	Des.	Element Name	
Must Use	SE01	96 Number of Included Segments	M N0 1/10
		Total number of segments included in a transaction set including ST and SE segments	
Must Use	SE02	329 Transaction Set Control Number	M AN 4/9

Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set

NOTE: The control number is assigned and generated by the sender's translation software. It should be sequential within the functional group to aid in error recovery and research. The control number in the SE segment (SE02) must be identical to the control number in the ST segment (ST02) for each transaction.

Cross-Reference to X12

A cross-reference matrix is provided to link the form HUD-92068A to the X12 transaction set 264. The matrix shows what information is needed for EDI, the associated 264 transaction set loop and segment, and the codes and data elements used for each HUD-92068A block number.

Adjunct Loan Default Transaction Sets

The following transaction sets are used in electronic loan default reports processing in conjunction with TS 264.

Transaction Set 824 — Application Advice. This transaction set can be used to provide the ability to report the results on an application system's data content edits of transaction sets. The results of editing transaction sets can be reported at the functional group and transaction set level, in either coded or free-form format. It is designed to accommodate the business needs of reporting acceptance, rejection, or acceptance with change of any transaction set. The application advice should not be used in place of a transaction set designed as a specific response to another transaction set.

For HUD, TS 824 returns errors found during the edit of the TS 264 submission of a loan default report and indicates that the loan default report must be resubmitted to enable HUD's application to successfully process the loan default report.

Transaction Set 997 — Functional Acknowledgment. This transaction set can be used to define the control structures for a set of acknowledgments to indicate the results of the syntactical analysis of the electronically encoded documents. The encoded documents are the transaction sets, which are grouping in functional groups, used in defining transactions for business data interchange. This standard does not cover the semantic meaning of the information encoded in the transaction sets.

Each time a 264 or functional group arrives at HUD, the mortgagee/servicer will be informed of receipt through the use of TS 997 — Functional Acknowledgment. The mortgagee/servicer will also inform HUD of receipt of the 824 via a 997.

Complete mapping documents of TS 824 is provided on the following pages. The other adjunct transaction set relevant to TS 264 - namely TS 997 - may also be used in conjunction with other transaction sets and can be found in Appendix D.
